

We Claim:

1. A cleansing composition comprising:
about 0.4 to about 5% of a humectant;
about 0.5 to about 5% of a solubilizer;
about 0.05 to about 5% chamomile;
about 0.2 to about 5% panthenol; and
water, the percentages expressed as weight-percent
based on the total weight of the composition.
2. The composition according to claim 1 wherein the
amount of water ranges from about 50 to about 97%.
3. The composition according to claim 2 wherein the
amount of water ranges from about 70 to about 97%; the
amount of humectant ranges from about 0.6 to about 3%;
the amount of solubilizer ranges from about 1 to about
3%; the amount of chamomile ranges from about 0.1 to
about 2%; and the amount of panthenol ranges from about
0.3 to about 2% by weight based on the total weight of
the composition.
4. The composition according to claim 3 wherein the
amount of water ranges from about 85 to about 97%; the
amount of humectant ranges from about 0.6 to about 1%;
the amount of solubilizer ranges from about 1 to about
2%; the amount of chamomile ranges from about 0.1 to
about 1%; and the amount of panthenol ranges from about

0.3 to about 1% by weight based on the total weight of the composition.

5 5. The composition according to claim 4 wherein the humectant is selected from the group consisting of propylene glycol, dipropylene glycol, and glycerine, the solubilizer is a nonionic solubilizer, and the composition is free of anionic, cationic, amphoteric, and betaine solubilizers.

10 6. The composition according to claim 5 wherein the solubilizer is polysorbate 20.

15 7. The composition according to claim 6 wherein the pH of the composition ranges from about 4 to about 6.

20 8. The composition according to claim 7 wherein the pH of the composition ranges from about 4.5 to about 6.

25 9. The composition according to claim 8 wherein lactic acid is utilized to adjust the pH of the composition.

30 10. A feminine hygiene wipe comprising a substrate and a cleansing composition comprising:

 about 0.4 to about 5% of a humectant;

 about 0.5 to about 5% of a solubilizer;

 about 0.05 to about 5% chamomile;

about 0.2 to about 5% panthenol; and
water, the percentages expressed as weight-percent
based on the total weight of the composition.

5 11. The wipe according to claim 10 wherein the amount
of water ranges from about 50 to about 97%.

10 12. The wipe according to claim 11 wherein the
humectant is selected from the group consisting of
propylene glycol, dipropylene glycol, and glycerine, the
solubilizer is a nonionic solubilizer, and the
composition is free of anionic, cationic, amphoteric,
and betaine solubilizers.

15 13. The wipe according to claim 12 wherein the
solubilizer is polysorbate 20.

20 14. The wipe according to claim 13 wherein the pH of
the composition ranges from about 4 to about 6.

25 15. The wipe according to claim 14 wherein the pH of
the composition ranges from about 4.5 to about 6.

16. The wipe according to claim 15 wherein lactic
acid is utilized to adjust the pH of the composition.

17. The wipe according to claim 10 wherein the basis weight of the substrate ranges from about 40 to about 60 g/m².

5 18. The wipe according to claim 17 wherein the amount of the composition on the wipe ranges from about 100 to about 400 %, expressed as the weight of the composition relative to the weight of the substrate in dry condition.

10 19. The wipe according to claim 18 wherein the amount of the composition on the wipe ranges from about 200 to about 400 %, expressed as the weight of the composition relative to the weight of the substrate in dry condition.

15 20. The wipe according to claim 10 wherein the substrate is selected from the group consisting of porous and absorbent sheets.

20 21. The wipe according to claim 21 wherein the substrate is a hydro-entangled nonwoven fabric.

25 22. A method of maintaining feminine health comprising the step of cleaning a female human's perineal region with the feminine hygiene wipe according to claim 10.
